FlushInspect

Water analysis system for flushing intervals

FLUSHING DEVICE USED FOR DATA ACQUISITION
 THROUGH THE LEVEL OF CONTAMINATION ON THE PIPE SECTION
 USING THE DATA TO DETERMINE STATE-ORIENTED FLUSHING INTERVALS
 FLUSHING STRATEGY SAVES RESOURCES, TIME AND COST

JOINT DEVELOPMENT OF FAST AND TZW
 FAST: FLUSHING DEVICE, HARDWARE, AND DATA ACQUISITION
 TZW: METHODOLOGY, CALCULATION MODELS, AND SERVICES

Connection between turbidity and GIS data

Evaluation of flushing data with conduction of flushing intervalls

APPLICATION

- Creating a flushing schedule: Flushing with clean waterfront
- Closing / opening valves to separate pipe sections
- Attaching Flush Inspect to flush outlet / hydrant
- Recording and evaluating the data, and developing a flush strategy
